Fix and clamp workpieces.
Universal and flexible.

ALUMESS – Compatibility with each other

The modular ALUMESS fixturing systems enable a precisely positioned and reproducible setup of clamping fixtures. They are designed for flexible use at the measuring station, on coordinate measuring machines, on optical measuring devices and in computer tomographs (CT).

For quick start up with the ALUMESS fixturing system we have various starter kits at our disposal which can be customized to your needs. We are also prepared to put together a kit specified to the customer's wishes.

+ ALUMESS at a glance

- + Easy, rapid and economical
- + Flexible
- + Robust
- + Reproducible
- + Universal and modular expandable

ALUMESS – Automation Ready

Flexibility. Quality. Productivity.

Today, manufacturing industry is facing a lot of challenges. Automation means that the skilled workers in production can concentrate on managing work which puts demands on their professional skill and means that they can forget about monotonous routine tasks. Automation keeps production going 24/7: every day of the week and every hour of the day.

In order to reduce the set-up process on your measuring machine to a minimum, the ALUMESS clamping systems are designed as a palletizing system. With the help of our automation systems, you can automatically and unmanned change pre-equipped workpiece pallets onto your coordinate measuring machine.
